Hiring Manager

GIRO

5800, rue Saint-Denis, Suite 1102

Montréal, Québec

Dear Hiring Manager,

I am thrilled to apply for the Fall 2024 Software Development Intern position at GIRO, as advertised. With a robust academic background in computer science, hands-on software development experience, and a passion for creating innovative solutions, I am excited about the opportunity to contribute to your team. GIRO's dedication to developing high-quality software that enhances public transport and postal services aligns perfectly with my career aspirations.

Currently, I am a third-year Computer Science student at the University of British Columbia, where I have built a strong foundation in programming, algorithms, and software development. My internships at Indian Railways Finance Corporation and Best Buy have provided me with practical experience in developing and enhancing software applications, implementing data validation features, and providing technical support. These experiences have strengthened my ability to troubleshoot complex issues, work collaboratively in agile environments, and deliver high-quality solutions efficiently.

I am proficient in various programming languages, including Python, Java, and SQL, and have experience with tools such as Git, Docker, and MySQL. My project work at UBC, including the development of applications like QuakeQuest and the Pet Community Application, demonstrates my ability to create user-focused applications that leverage data effectively and provide intuitive user interfaces.

GIRO's innovative approach and commitment to improving urban mobility and postal services resonate deeply with me. I am confident in my ability to contribute to your software development team, support integration projects, and help develop reliable and efficient software solutions.

I have attached my resume for your review. Thank you for considering my application. I look forward to the opportunity to discuss how my background, skills, and enthusiasm can contribute to the success of GIRO.

Sincerely,

Aayush Chaudhary
